

Power generation equipment container house supply

- ✓ **ALL IN ONE**
- ✓ **100Kw/174Kwh
High Capacity**
- ✓ **Intelligent
Integration**

Overview

What is a containerised generator?

Our Containerised Generators deliver robust, high-capacity power from 300–3,000 kVA in secure, weather-resistant enclosures. Designed for challenging environments and critical applications, they offer noise reduction, easy transport, and bespoke configuration to meet your site's exact needs.

Which genset containers are available?

All genset containers are also available with an option for -40°C and most variants can be upgraded for $+45^{\circ}\text{C}$. A broad range of options, both mechanical and electrical, are available to ensure that our containers meet the project requirements. For example, we offer several heat recovery configurations and exhaust after treatment systems.

Where can a portable power container be used?

The MOBIPOWER portable power container can be used virtually anywhere on the planet and will produce and store all the power you will need.

How many power supplies can be mounted in a 40ft container?

Power supplies $<300\text{kW}$ can be mounted in only a single 40ft container, while greater powers can be achieved in multiple containers and connected upon delivery. Depending upon specifications, containerized power supplies may be stacked, or located side-by-side. Setup and testing or shut-down and packing can be achieved within a matter of days.

What size generator container do I Need?

Our generator containers for Type 2, 3, and 4 gas engines have a standard 40-foot length. Width and height depend on engine type, the application (power generation only or CHP) and ambient conditions. Customized sizes to accommodate special project requirements are available on request.

Why should you choose a containerised generator?

Containerised Generators are trusted across industries where reliability and resilience are non-negotiable, such as Healthcare and Rail infrastructure. Every unit can be tailored to your project with options for fuel type, noise attenuation, and space-saving layout.

Power generation equipment container house supply

[MOBIPower Containerized Off-Grid Power Systems](#)

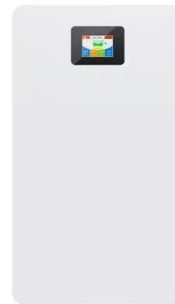

MOBISmart is the leading provider of advanced, mobile, solar off-grid power generation and storage systems that can be easily deployed to construction sites in urban, rural and remote ...

[Product Information](#)

[Shipping Container Solutions for the Wind & Solar ...](#)

Supply Chain Management: Warehouses serve as distribution hubs for managing the flow of materials, equipment, and components to and from wind and solar ...

[Product Information](#)

Power stations designed as containers , Alois-Müller-Gruppe

At our Green Factory, we provide you with extensive manufacturing and production services for mobile power stations designed as containers. Our solutions are your benefits: quality ...
