

Qatar has many energy photovoltaic sites

Overview

Doha, Qatar: Qatar is making major strides in renewable energy, with three large-scale solar power plants now operational and more ambitious projects on the horizon, according to Eng Mohammed Abdullah Bu Kashisha, Monitoring Engineer at Qatar General Electricity & Water Corporation (Kahramaa), in an interview with Qatar TV. Does Qatar have a solar power plant?

Representational image. Credit: Canva QatarEnergy has officially inaugurated the Ras Laffan and Mesaieed solar photovoltaic (PV) power plants, adding a combined 875 megawatts (MW) to the nation's renewable energy capacity. The launch brings Qatar's total solar output to 1,675 MW, marking a significant step in the country's clean energy transition.

What is Qatar's Solar Energy Future?

Qatar's solar energy future is steadily developing. With average daily sunshine of around 9.5 hours, low-cloud cover conditions and plentiful space, there is great scope for small, medium as well as large-scale solar power projects in the country.

Is Qatar a good country for solar power?

With average daily sunshine of around 9.5 hours, low-cloud cover conditions and plentiful space, there is great scope for small, medium as well as large-scale solar power projects in the country. Qatar's global horizontal irradiance is 2,140 kWh per m² per year which makes it well-suited for solar photovoltaic (PV) systems.

How to develop solar power in Qatar?

Currently, efforts have focused on developing solar capacity in the country through research centers, universities, utilities and pilot projects, and a number of institutions including Kahramaa, Qatar Foundation, QNFSP and QSTP are actively working on this front.

What is Qatar's first large-scale solar project?

Al Kharsaah, Qatar's 1st large-scale solar project, will start providing sustainable, economical, and clean energy to enterprises, organizations, and citizens via the Qatari grid in 2021, with a 350 MWp capacity initially, before attaining maximum capacity in 2022.

Is Qatar undergoing a significant transformation in its energy sector?

Doha: The State of Qatar is undergoing a significant transformation in its energy sector since 2022, with the launch of Ras Laffan and Mesaieed solar power plants on Monday.

Qatar has many energy photovoltaic sites

Qatar's solar energy projects: Green energy in heart of desert

One of Qatar's flagship renewable energy projects is the Al Kharsaah solar power plant west of Doha. With a production capacity of 800 megawatts across 10sq km and ...
