Overview

Will Russia support Russian base stations for 4G & 5G networks?

In early October 2022, it became known about the decision of the Government of the Russian Federation to support manufacturers of Russian base stations for 4G- and 5G networks. { {quote 'As for 5G and 4G, we have introduced a restriction on the use of new foreign base stations since 2023, now a lot of work is underway with telecom operators.

Does Russia have a 5G network?

Prior to Russia's invasion of Ukraine, foreign vendors previously helped with limited 5G test zones in the country. In January of this year, Russian telecom operators entered into forward contracts with domestic manufacturers for the supply of base stations, including a plan for the supply of equipment for 5G networks for over \$1.32 billion.

How many base stations are there in Russia?

According to Vedomosti, by the end of November 2020, there are about 90 thousand base stations in the Russian capital, and with the launch of 5G networks, the number of such equipment will at least triple.

Will Ericsson build a 5G base station in Russia?

In December 2021, Kommersant, citing its sources, wrote that Ericsson is preparing for the process of localizing the production of 5G base stations in the Russian Federation. According to the publication, the Swedish company is considering options for partnership or creating its own site for the production of equipment.

What is a 5G NR Network?

As defined in 3GPP TS 38.300, the 5G NR network consists of NG RAN (Next Generation Radio Access Network) and 5GC (5G Core Network). As shown, NG-RAN is composed of gNBs (i.e., 5G Base stations) and ng-eNBs (i.e., LTE base

stations). The figure above depicts the overall architecture of a 5G NR system and its components.

Will a new LTE base station be made in Russia?

The head of the Ministry of Digital Science Maksut Shadayev said earlier in 2021 that an agreement had been reached with two manufacturers on localization in the Russian Federation, the transfer of rights to Russian partners for the production of modern LTE base stations.
