

Russian crystalline silicon photovoltaic panel manufacturer

Overview

Who is solar silicon technologies?

Solar Silicon technologies, LLC is the Russian manufacturer producing and selling monocrystalline and multicrystalline silicon wafers for solar energy market. Modern production site is located in the Central part of the Russian Federation, on the territory of the former PCMP plant in Podolsk.

Are solar panels transforming the solar energy sector in Russia?

The solar energy sector in Russia is witnessing a significant transformation, marking a pivotal shift towards renewable energy sources. Amidst this change, solar panels have emerged as a cornerstone for solar power generation, fostering a dynamic environment for manufacturers and supply chain centers across the country.

Is Russia a good place to make solar panels?

Russia is one of the top countries in terms of renewable energy production. It is one of the top producers in the EU and the rest of the world. Therefore, there is a wide array of equipment suppliers and distributors in and out of Russia for those looking to make solar installations.

Where are photovoltaic modules made?

Modern production site is located in the Central part of the Russian Federation, on the territory of the former PCMP plant in Podolsk. The annual production capacity of monocrystalline and multicrystalline silicon wafers for high-efficiency photovoltaic modules makes 220 MW.

Where are the top ten polysilicon & solar module manufacturers?

According to EnergyTrend, the 2011 global top ten polysilicon, solar cell and solar module manufacturers by capacity were found in countries including People's Republic of China, United States, Taiwan, Germany, Japan, and Korea.

Why is Novosibirsk a good place to invest in solar panels?

The city's supportive regulatory environment and incentives for green energy projects further enhance its appeal as a prime location for solar panel supply chain activities. Novosibirsk, Russia's third-largest city, is another vital supply chain center for the solar industry.
