

Russian telecommunications photovoltaic base station manufacturer

Overview

Who makes cellular base stations in Russia?

For example, Yadro has opened the first production line in Russia for electronic modules for cellular base stations, Izvestia was told by X Holding, which it belongs to. This is one of the key production elements required for a full-fledged large-scale production of base stations, which is scheduled for the end of this year.

Who makes Russian base stations?

Since 2022, in addition to Irtei, Russian base stations have been developed by Bulat (51% of Rostelecom) and KNS Group (Yadro brand, part of ICS Holding). The government expects that by 2029 all base stations of GSM, LTE and 5G standards installed by telecom operators will be exclusively Russian-made.

How many base stations are there in Russia?

According to Vedomosti, by the end of November 2020, there are about 90 thousand base stations in the Russian capital, and with the launch of 5G networks, the number of such equipment will at least triple.

Will Russian base stations speed up the development of Russian components?

Experts consider the mechanism timely, but emphasize that it will not speed up the development of Russian components. In early October 2022, it became known about the decision of the Government of the Russian Federation to support manufacturers of Russian base stations for 4G- and 5G networks .

How does Russian government support telecom manufacturers in 2022?

In November 2022, the Ministry of Digital Development developed a new mechanism to support Russian manufacturers of telecom equipment, printers and modems through subsidizing the rate on loans for the purchase of an electronic component base, primarily foreign. A similar mechanism, but for computer vendors, was launched in the spring.

When will Russian base stations be available for LTE?

At the end of December 2021, Deputy Prime Minister Dmitry Chernyshenko announced the timing of the start of serial production of Russian base stations for LTE networks . According to preliminary estimates, if demand is provided, we will be able to enter mass production of domestic 4G base stations by 2023, "he told RIA Novosti.

Russian telecommunications photovoltaic base station manufacture

Bulat Base Stations in Rostelecom

The introduction of Russian-made base stations is part of a strategy to develop the domestic telecommunications industry and create an independent mobile infrastructure in the country.
