

# **Saint Kitts and Nevis Energy Storage New Energy**

## Overview

---

Does St Kitts and Nevis have a national energy policy?

Yes, St. Kitts and Nevis has a National Energy Policy (NEP). The key provisions of this policy include connecting large-scale independent power providers and many distributed renewable energy systems to the electrical grid. Not all generation is made publically available; this chart provides known and referenceable data.

How much does electricity cost in St Kitts & Nevis?

The electricity rates in the Federation of St. Christopher (St. Kitts) and Nevis are \$0.26 per kilowatt-hour (kWh). This is lower than the Caribbean regional average of \$0.33/kWh.

How much energy is lost in St Kitts & Nevis?

Reports indicate that in St. Kitts and Nevis, higher losses are largely attributable to nontechnical losses such as unmetered consumption, leading to losses that are higher than the U.S. Energy Information Administration's average transmission and distribution loss of 6%. By comparison, the U.S. Energy Information Administration reports an average transmission and distribution loss of 6%.

Should St Kitts and Nevis be connected?

“With geothermal, it justifies interconnecting the two islands. St. Kitts and Nevis then becomes one electrical grid, so any industry developed on St. Kitts or Nevis will be able to share any renewable energy resource on either island,” explained Minister Maynard.

Can St Kitts & Nevis be a sustainable island state?

Developing a geothermal power project has been a transformative process for St. Kitts and Nevis, setting it on a path to being a fully sustainable island state.

## Will St Kitts & Nevis host geothermal energy summit 2025?

As St. Kitts and Nevis prepares to host the Global Sustainable Islands Summit 2025 and the Geothermal Energy Forum, Minister Maynard extended an invitation to renewable energy stakeholders worldwide to participate in these events. “This is an opportunity to be part of history,” he emphasised.

## Saint Kitts and Nevis Energy Storage New Energy
