

Senegal Power Generation Container BESS

Overview

When will a battery energy storage system start in Senegal?

Construction of the battery energy storage system is expected to commence in early 2024 at the Tobène substation in Thies and is expected to become operational in 2025. Once complete, it will be one of the largest of its kind in West Africa, and will help Senegal to avoid approximately 37,000 tonnes of carbon dioxide emissions each year.

Where is a Bess project being built in Senegal?

The BESS is to be built at the Tobène substation in Thies, Senegal. It will be operated by Infinity Power's 158.7 MW wind farm in Senegal, Parc Eolien Taiba N'Diaye (PETN).

When will Senegal's Bess project start?

The BESS is expected to begin construction in early 2024 at the Tobène substation in Thies and is expected to become operational in 2025. Once completed, the system will be one of the largest of its kind in West Africa and will help Senegal avoid approximately 37,000 tonnes of carbon dioxide emissions each year. Have you read?

.

How will Senelec's new power plant help Senegal?

The planned facility, described as one of the largest of its kind in West Africa, will help Senelec stabilise the country's electricity grid and pave the way for further renewable energy growth in Senegal.

How will Senelec's Bess work?

The system will enable Senelec to stabilise the nation's electricity grid and pave the way for further renewable energy growth in Senegal. The BESS is expected to begin construction in early 2024 at the Tobène substation in Thies

and is expected to become operational in 2025.

Why is battery storage important in Senegal?

Battery storage offers incredible opportunities for Senegal to reap the benefits of renewables, while ensuring people get a secure, reliable supply of energy. We are excited to begin a promising new chapter in Senegal and further strengthen our work in the renewable energy sector.”
