

Senegal container energy storage system

Overview

When will a battery energy storage system start in Senegal?

Construction of the battery energy storage system is expected to commence in early 2024 at the Tobène substation in Thies and is expected to become operational in 2025. Once complete, it will be one of the largest of its kind in West Africa, and will help Senegal to avoid approximately 37,000 tonnes of carbon dioxide emissions each year.

Why is battery storage important in Senegal?

Battery storage offers incredible opportunities for Senegal to reap the benefits of renewables, while ensuring people get a secure, reliable supply of energy. We are excited to begin a promising new chapter in Senegal and further strengthen our work in the renewable energy sector.”.

Why does Senegal need a new container terminal?

Dakar city today is choked by over 1,000 trucks entering the container terminal each day. Senegal and the region needs expanded capacity to support growth, avoid supply chain disruptions, and over time decrease the cost of essential imported goods.

Senegal container energy storage system
