

# **Should I buy an outdoor power supply**

## Overview

---

Should you get a portable power station?

Everyone should probably have a portable power station. These are essentially enormous batteries that can store electricity and power a range of devices and appliances when the lights go out. If you can't run a gas generator or want power that's more portable, this is a no-brainer.

What should you consider when buying a portable station?

Frequent use and required ports are two major factors to consider when buying a portable power station. Think about how often you'll use it and what devices you need to power, then make sure the model you choose offers the necessary ports—USB, wireless charging, AC, DC, etc.

What is the best portable power station?

This unit offers lots of power in a portable, durable, easy-to-use package. Plus, it has a wide array of outlets and charging ports to keep your essential devices running off-grid. The EcoFlow River 2 Pro is the best portable power station for most people. It's relatively light, ruggedly built, intuitive to use, and reliable.

Are portable power stations a good option for a blackout?

Portable power stations are not a whole-house power solution, but they will make your next blackout a lot more comfortable. They are generally much smaller than gas generators, making them easy to store until you need to use them.

What makes portable power stations safe for indoor use?

Portable power stations are safe for indoor use because there are no fumes or other concerns. Unlike a gas generator, you can operate these power stations indoors safely.

Are portable power stations better than gas-powered generators?

In an emergency, these power stations offer some major advantages over gas-powered portable generators, despite being less powerful. Portable power stations are silent and don't produce additional emissions, so you can use them safely indoors and while you're sleeping.
