

Slovenia Home Solar System Application

Overview

How much will Slovenia spend on solar energy projects?

Data Protection Policy Slovenia has set aside €16 million (\$16.7 million) to support solar energy communities, requiring projects to include at least 100 kW of PV capacity, with or without storage. The program will run until 2027.

How much power does a photovoltaic system need in Slovenia?

The government and Slovenia's EU Cohesion Policy Program are co-financing the initiative, the ministry said in a statement. "The total nominal power of the installed photovoltaic modules must be at least 100 kW, with or without battery energy storage systems," the authorities said.

Will Slovenia subsidize new self-sufficient PV energy communities?

The Slovenian Ministry of Cohesion and Regional Development has launched a €16 million program to subsidize new self-sufficient PV energy communities. The government and Slovenia's EU Cohesion Policy Program are co-financing the initiative, the ministry said in a statement.

Does Slovenia have solar power?

Per analysis published by the World Bank which considers natural features of a location such as altitude, humidity, cloud cover, and topography, Slovenia's solar PV potential is relatively low compared to global resources, but is comparable to that of other central and eastern European countries which lie north of the Alps.
