Overview

What is a portable solar panel?

A portable solar panel is an innovative, compact, and lightweight photovoltaic system with a foldable design. In most cases, portable solar panels are monocrystalline and produce direct current (DC) through the sun's energy. Unlike full-sized solar panels, portable solar panels imply mobility and convenience for outdoor activities.

Are portable solar panels worth it?

Just a decade ago, consumer-grade portable solar panels weren't effective or popular, but rapid improvements in panel design and solar generators have made them a must for campers, overlanders, RVs, or home backup power. There are now so many foldable solar panels and solar panel kits available that it can be difficult to know where to begin.
