

Small solar power generation system in Bahrain

Overview

With 8,000 “Canadian” type solar panels and 28 ABB inverters, it will have a capacity to produce 5,366 GWh per year. Bahrain gets some of the world's highest levels of sun radiation. Given the abundance of sunlight in the kingdom, the country is focusing on producing solar electricity. Is Bahrain transitioning to solar energy projects?

After the establishment of the Sustainable Energy Unit (SEU) in Bahrain in 2014, a radical transition toward launching solar energy projects can clearly be observed. The SEU was established in collaboration between the national government and the United Nations Development Program (UNDP).

How will a 100 MW solar PV plant be built in Bahrain?

Once the necessary rehabilitation is complete, a 100 MW solar PV plant will be constructed. On the distribution side, Bahrain has adopted a net metering system, allowing businesses and individuals to install solar systems and supply excess electricity to the EWA grid.

How big is Bahrain's photovoltaic capacity?

According to estimates by the International Renewable Energy Agency, Bahrain's photovoltaic (PV) capacity was around 10 MW at that time. Large-scale plants offer one way to rapidly scale up renewable energy deployment. One notable project is the Askar landfill site in southern governorate.

Is Bahrain's first solar panel company the start of a sea change?

This is good news for Solar One, Bahrain's first solar panels company. Since its founding in 2017, the startup boasts of contributing over two megawatts of solar to the country's energy mix — enough to power around 380 US homes. It's a drop in the ocean, but it hopefully marks the beginning of a sea change.

Are Bahrainis willing to pay the full cost of solar PV systems?

According to the cross tabulation results, majority of participants who were

willing to pay the full cost of residential solar PV systems were Bachelor degree holders with the average per-capita monthly income for Bahrainis.

Is solar PV a social issue in Bahrain?

Although there are fewer peer-reviewed studies on the social aspects of solar PV compared to technical studies, the present research sheds light on public perspectives on this topic in Bahrain. In fact, it used a cross-sectional design for this purpose.
