Overview

What is a smart energy system?

Smart energy is a revolutionary approach to energy management that leverages advanced technologies to optimize energy consumption, reduce costs, and enhance sustainability. By harnessing the power of renewable energy sources like solar and wind, smart energy systems are transforming the way we power our homes and businesses.

What are smart energy technologies?

Advances in energy technology – such as smart thermostats, LED lighting, solar panels, electric cars and more – are giving you more options for meeting your personal energy goals than ever before. View our resources below to learn more about smart energy technologies and how they might benefit you and your community.

Where can I contact SmartEnergy?

Address: 2028 You can send us correspondence or visit our offices located at: 2028 74 W Broad Street, STE 530 Bethlehem, PA 18018 At SmartEnergy, we value your trust and strive to provide exceptional service, helping you build a cleaner, more sustainable energy future. Contact us today!.

Why should I Choose SmartEnergy?

When you choose SmartEnergy as your electric supplier, your utility will continue to send you your bill, deliver your electricity and respond to emergencies, just with 100% renewable energy. Our renewable resources include solar, wind, hydroelectric, and geothermal energy, making us a cleaner option for both your home and the planet.

How does SmartEnergy work?

SmartEnergy purchases renewable energy credits (RECs) to offset 100% of your electricity usage and seeks to provide real value to our customers. With

no equipment necessary, no service interruption, and no enrollment or cancellation fees, there's never been a better time to try SmartEnergy.

How do you understand smart energy?

In summary, understanding smart energy begins with recognizing its core components: smart grids, renewable energy sources, and energy storage systems. Each plays an essential role in improving energy efficiency and sustainability while adjusting to the growing demands of energy consumption.
