Solar Panel Cost System

Overview

How much does a residential solar panel system cost?

What is the average cost of a solar system for a house?

 The cost of a solar power system is measured in dollars per watt. The average cost for a residential system is currently $ 3-5 per watt. This means that the average 5 kW residential system will cost $ 15,000- $ 25,000, before tax credits or incentives.

What is the approximate cost of solar panels?

The cost of solar panels to power your house are $4 to $10 per square foot. However, most installers estimate solar costs by the amount of energy needed, at $2.53 to $3.15 per watt before any tax credits or incentives. Below are cost estimates based on home size.

How much does a 5kw Solar System cost?

When installed, an average 5 kW residential system costs between $3 and $5 per watt according to the CSE, resulting in the $15,000 to $25,000 range. Those costs are before any tax credits and incentives. If you know your current energy consumption, you can calculate how much you should pay for solar panels.

Is it worth it to install solar panels?

When installations are assessed, designed and performed properly, solar energy is one of the best investments you can make. Solar panels are worth it for the majority of customers in the country, but there are certainly some disqualifiers, as described above.
