

Solar Panel Enterprise Expansion Project

Overview

SEIA makes major solar project data available to the public through the map below. SEIA members have exclusive access to the list as a sortable, searchable MS Excel file that is.

SEIA does not guarantee that every identified project will be built. Like any other industry, market conditions may impact project economics and timelines. SEIA will remove a project if it is publicly announced that it has been canceled. SEIA actively.

What is a large-scale solar energy project?

The project is a large-scale solar energy initiative developed on 10,000 acres of land north of the city of London near Plumwood in Madison County. The project is expected to have a maximum generating capacity of up to 800 MW of clean electricity. It will also include a Battery Energy Storage System (BESS) of up to 300 MW.

What is the major solar projects list?

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development. The list is for informational purposes only, reflecting projects and completed milestones in the public domain.

What is Oak Run solar project?

Oak Run Solar Project, LLC plans to construct the proposed Oak Run Solar Project in Ohio. The project is a large-scale solar energy initiative developed on 10,000 acres of land north of the city of London near Plumwood in Madison County. The project is expected to have a maximum generating capacity of up to 800 MW of clean electricity.

How is the list of solar projects gathered?

The information in the list was gathered from public announcements of solar projects in the form of company press releases, news releases, and, in some cases, conversations with individual developers. It is not a comprehensive list

of all utility-scale projects under development.

How many solar projects are there?

There are more than 7,950 major solar projects currently in the database, representing over 340 GWdc of capacity. There are over 1,200 major energy storage projects currently in the database, representing more than 89,000 MWh of capacity. The list shows that there are more than 180 GWdc of major solar projects currently operating.

Will solar construction & labor shortages worsen over the next 5 years?

However, the solar industry faces significant construction and labor shortages that could worsen over the next three to five years. As solar projects grow in number and size, demand for engineering, procurement, and construction companies (EPCs) and for the labor and materials required to build projects is expected to increase rapidly.
