

Solar panel usage in the photovoltaic industry

Overview

What will drive the growth of solar PV panels industry?

Growing demand for renewables-based clean electricity coupled with government policies, tax rebates, and incentives to install solar panels is expected to drive the growth of solar PV panels industry in the coming years. Asia Pacific held the largest market share of over 54.0% in 2023.

Why are solar PV systems used in residential and commercial applications?

Solar PV systems are employed in residential, commercial, and utility applications on account of decreasing cost and high efficiency. Increasing government focus on renewable energy has resulted in the development of PV cells as a sustainable and continuous source of energy generation.

How much solar power did the US solar industry install in 2024?

In 2024, the US solar industry installed nearly 50 gigawatts direct current (GWdc) of capacity, a 21% increase from 2023. This was the second consecutive year of record-breaking capacity. Solar accounted for 66% of all new electricity-generating capacity added to the US grid in 2024, as the industry continued experiencing record growth.

What is solar photovoltaics & why is it important?

Solar photovoltaics is one of the most cost-effective technologies for electricity generation and therefore its use is growing rapidly across the globe. Global solar photovoltaic capacity has grown from around 40 gigawatts in 2010 to approximately 2.2 terawatts in 2024. Only in that last year, installations increased by almost 40 percent.

What is the global solar PV panels market size?

The global solar PV panels market size was estimated at USD 170.25 billion in 2023 and is projected to reach USD 287.13 billion by 2030, growing at a compound annual growth rate (CAGR) of 7.7% from 2024 to 2030.

How is the solar energy industry growing?

These ten hand-picked data points showcase the industry's remarkable growth. China holds over 35% of worldwide solar market share. The solar energy market is rapidly expanding, transitioning from an alternative energy source to a mainstream power generation solution.

Solar panel usage in the photovoltaic industry

[Solar Market Insight Report 2024 Year in Review - SEIA](#)

Solar accounted for 66% of all new electricity-generating capacity added to the US grid in 2024, as the industry continued experiencing record growth. Domestic module ...
