

Solar panels closed

Overview

What happens if solar panels go out of business?

Solar panels are a long-term commitment that can require maintenance and service throughout their lifetime. If the company that installed the panels on your roof goes out of business, you could be left in a pickle. Last year, we saw a number of high-profile solar companies shut their doors, including SunPower filing for bankruptcy.

Did a solar company close its doors?

Read More: Another Solar Company Goes Bust Titan was the largest solar installer to close its doors when it shut down June 13, according to research firm Wood Mackenzie, but customers like Palmer are not alone in having nonworking panels on their homes and nowhere to turn.

What happens if a solar contractor is closed in 2024?

The closure of numerous solar contractors in 2024 has sent ripples through various facets of the solar market, affecting customers, ongoing projects, and the industry. Homeowners with ongoing installations face uncertainty and potential delays. Customers amid warranty or service agreements may find themselves without support.

Can a solar company go out of business?

Last year, we saw a number of high-profile solar companies shut their doors, including SunPower filing for bankruptcy. Many factors can drive a company to go out of business, and depending on your situation, you can take a few steps to ensure their closing does not mess with your solar access.

Do solar panels need to be removed?

When customers sign a solar lease or power purchase agreement (PPA), the solar company agrees to cover the cost of the panel removal when the lease is up, usually after 20 years. But big companies like SunRun assume that 90% of

customers will renew their agreement and keep their panels, according to a report by the research firm Muddy Waters.

Why do solar companies fail?

Now, we're peeling back the curtain to figure out why. Pol Lezcano, an analyst at Bloomberg New Energy Finance (NEF), said the major reason for the downfall of big residential solar companies in the U.S. is their fragile business structure. "These companies have very, very expensive business models, and they're running very, very thin margins."
