

Solar panels installed upside down

Overview

While you can mount solar panels upside down, and while people have done it before, you should probably avoid mounting solar panels upside down unless the manufacturer specifically instructs you to do so.

It's helpful to know a little background about mounting solar panels before understanding why mounting solar panels upside down isn't the best idea. Let's jump into.

Clearly it's pretty important to mount solar panels the correct way. It's also really important to mount solar panels safely. If you're planning on getting solar panels and.
