

# **Solar photovoltaic panel project in Mexico**

## Overview

---

Historically, the main applications of solar energy technologies in Mexico have been for non-electric system applications for , water heating and drying crops. As in most countries, wind power development preceded solar power initially, due to the lower installation cost. Since solar power is not available during the night, and because wind power tends to be complementary to solar, a mix of both can be expected. Both require substantial

## Solar photovoltaic panel project in Mexico

---

[Mexico has the potential to develop more photovoltaic ...](#)

In Mexico there is an excellent opportunity to develop photovoltaic plants, stated Carlos Ortiz, former president of the Mexican Association of the ...
