

Sudan Energy Storage Peaking Power Station Project

Overview

Where will Sudan's first wind power plant be located?

Sudan has advanced a major step in developing its first wind power plant with the arrival of the wind turbine to be located in Dongola in the northern state, as part of the UNDP's wind energy project in the country.

How many companies are in the electricity sector in Sudan?

The electricity sector is administratively unbundled into five sector companies: Sudan Electricity Holding Company (SEHC), Sudan Thermal Power Generation Company (STPG), Sudan Hydro and Renewable Energy Company (SHREC), Sudan Electricity Transmission Company (SETC) and Sudan Electricity Distribution Company (SEDC).

Will Sudan face an energy problem in the future?

In December 2014, the United Nations Development Programme (UNDP) warned that Sudan could face an energy problem in the future, if it does not set up alternative power solutions, mainly because of the rapid growth in energy demand .

Does Sudan have a problem with electricity supply?

Sudan is currently facing a major problem with electricity supply. According to the report " Tracking SDG 7: The Energy Progress Report (2021) ", only 54% of the population in Sudan have access to electricity; this indicates more than 20 million people aren't connected to the national electricity grid .

Does Sudan have a low electricity access rate?

Even though the energy access rate is low; Sudan is making progress in electrification with annual growth over more than 3 percentage points after 2010; more than 70% of Sudan's population was lacking access to electricity at that time . Table 1 below represents statistical facts about Sudan's electricity access rate from (2000 – 2019).

What is Sudan's first wind turbine?

Sudan's first wind turbine is 63 m-tall and is expected to produce 100 MW of affordable clean energy to provide power for at least 14,000 people in Sudan's northern state . Figure 2: Sudan first wind turbine traveling to wind farm site in Dongola. Hydropower in Sudan
