

Sunroom Home Solar Panel Installation

48V 100Ah

Overview

Is it easy to install a sunroom kit?

Installing a sunroom kit is not an easy task and should always be handled by a skilled and licensed sunroom contractor. Many DIY sunroom kit installation videos found online tend to downplay the complexity of installing a sunroom and make it 'look easy'.

How do I design a sunroom for my home?

When building and designing a sunroom for your home one of the most important first steps is to decide how big space will be as well as the primary usage. If you plan to have a nice relaxing room to read or nap, then your style and features should reflect that.

Where should a sunroom be built?

Ideally, a sunroom should be built facing south where the sun can shine on it continuously throughout the day. If that's not an option, then choose an east-facing sunroom to enjoy the sunrise or a west-facing sunroom for evening sunsets. If you're planning to use it as a dining area, try to plan it as close to the kitchen as possible.

Does Project Sunroof have solar data?

We currently have solar data for portions of 50 states and Washington DC. See if we've got you covered. Project Sunroof is a solar calculator from Google that helps you map your roof's solar savings potential. Learn more, get an estimate and connect with providers.
