

Swiss energy storage products

Overview

How will a large-scale storage system help the Swiss power grid?

In this way, the system will help to stabilise the Swiss power grid. With this large-scale storage system, we are making a decisive contribution to the implementation of Switzerland's Energy Strategy 2050, which aims to convert 100 per cent of its energy supply to renewable energies by 2050.

Where in Switzerland will Primeo energy install a battery storage system?

In Kappel, in the canton of Solothurn, we will install one of the largest battery storage systems in Switzerland with a total capacity of 65 megawatt hours. Primeo Energie will use the stand-alone storage system to make energy more flexible and store electricity temporarily and withdraw it again when it is needed.

Does Switzerland's new large-scale battery support the Energy Strategy 2050?

The new large-scale battery for Switzerland in Kappel supports the Energy Strategy 2050 and supports renewable energies.

How will Primeo energy contribute to the Swiss energy transition?

We are delighted to be taking a significant step in the Swiss energy transition together with Primeo Energie. In Kappel, in the canton of Solothurn, we will install one of the largest battery storage systems in Switzerland with a total capacity of 65 megawatt hours.

Can energy storage help achieve net-zero goals?

The Role of Energy Storage in Achieving Net-Zero Goals As the world races toward a more sustainable future, the quest for Net-Zero emissions has become a central focus for governments, businesses, and communities alike. A critical piece of this puzzle

Swiss energy storage products

Energy Vault®

G-VAULT(TM) is a family of gravity energy storage products that decouple power and energy while maintaining a high round-trip efficiency. The G-VAULT(TM) platform utilizes a mechanical ...

[Product Information](#)

Storage solutions

Energy storage solutions will take on a dominant role in fulfilling future needs for supplying renewable energy 24/7. It's already taking shape today - and in the coming years it will ...

[Product Information](#)

[Unbound Potential \(A Swiss startup develops a low-cost, ...\)](#)

Unbound Potential, a Swiss energy storage startup founded in 2023, develops a low-cost membrane-free redox flow battery system for long-term energy storage.

Large-scale battery for Switzerland: 65 megawatt hours of capacity

With this large-scale storage system, we are making an important contribution to implementing Switzerland's Energy Strategy 2050. The country is pursuing the goal of transitioning its ...

[Product Information](#)

[· Swiss Energy Storage Overview by BFH-CSEM ...](#)

Energy storage is rapidly become more and more relevant due to the increasing renewable energy fraction in the grid, the rise of photovoltaics and the ...

[Product Information](#)

CE UN38.3 MSDS

[· Swiss Energy Storage Overview by BFH-CSEM ...](#)

Welcome Energy storage is rapidly become more and more relevant due to the increasing renewable energy fraction in the grid, the rise of photovoltaics and ...

[Product Information](#)

[Swiss Energy Storage Project Bidding: Key Insights for 2025](#)

You know, Switzerland's energy landscape is at a crossroads. With nuclear phase-outs accelerating and renewable targets tightening (40% clean energy by 2035), the country's ...

[Product Information](#)

Grid-Level Energy Storage Products: Powering the Future of ...

Enter grid-level energy storage products, the Swiss Army knives of electricity management. These systems don't just store energy; they're rewriting the rules of how we balance supply spikes, ...

[Product Information](#)

Swiss Energy Storage 2025: Powering the Future with Innovation ...

So there you have it - Switzerland's energy storage landscape in 2025 isn't just about electrons in boxes. It's a wild ride of innovation where precision engineering meets ...

[Product Information](#)

• Swiss Energy Storage Overview by BFH- CSEM Energy Storage ...

Energy storage is rapidly become more and more relevant due to the increasing renewable energy fraction in the grid, the rise of photovoltaics and the increase in electric cars.
