

Swiss home energy storage battery company

Overview

What is Swiss clean battery?

Swiss Clean Battery focuses on the stationary fields of application of “home storage” and “industrial buffer”, because the demand and contribution to solving problems in the energy transition is equally great here. An uninterrupted power supply, i.e. the balance between supply and demand, is essential for the power grid as a whole and for industry.

Where in Switzerland will Primeo energy install a battery storage system?

In Kappel, in the canton of Solothurn, we will install one of the largest battery storage systems in Switzerland with a total capacity of 65 megawatt hours. Primeo Energie will use the stand-alone storage system to make energy more flexible and store electricity temporarily and withdraw it again when it is needed.

Does Switzerland's new large-scale battery support the Energy Strategy 2050?

The new large-scale battery for Switzerland in Kappel supports the Energy Strategy 2050 and supports renewable energies.

Why should you choose Swiss clean battery?

The high standardization of factory construction promotes economies of scale and rapid implementation, so that the total capacity of 7.6 gigawatt hours will be reached in just a few years. When building the factory and equipping it with the necessary production facilities, Swiss Clean Battery draws on established and renowned partners.

Why do we need battery storage systems?

In future, battery storage systems can play an important role in managing electricity generation that fluctuates with wind or photovoltaics, or help to minimize the required network expansion and at the same time improve charging comfort.

Swiss home energy storage battery company

Swiss Luxury Home Battery 2025: Premium Villa Energy Storage ...

Energy Challenges for Swiss Villas Swiss villa owners face Europe's highest electricity prices, projected at CHF 0.28/kWh in 2025, along with increasing concerns about grid reliability. As a ...
