

Tender for wind power generation at communication base stations

Overview

How important is the design of wind energy tenders?

The proper design of wind energy tenders is of utmost importance for wind energy's growth, as wind power is currently the generating technology with the highest rate for new installations in 2014 (43.7%).

Can wind energy be used to power mobile phone base stations?

Worldwide thousands of base stations provide relaying mobile phone signals. Every off-grid base station has a diesel generator up to 4 kW to provide electricity for the electronic equipment involved. The presentation will give attention to the requirements on using windenergy as an energy source for powering mobile phone base stations.

Why do off-grid telecommunication base stations need generators?

As the incessant demand for wireless communication grows, off-grid telecommunication base station sites continue to be introduced around the globe. In rural or remote areas, where power from the grid is unavailable or unreliable, these cell sites require generator sets to provide power security as prime power or backup standby power.

Tender for wind power generation at communication base stations

Application of wind solar complementary power generation ...

At present, many domestic islands, mountains and other places are far away from the power grid, but due to the communication needs of local tourism, fishery, navigation and ...
