

Thailand 5G communication base station project

Overview

When did 5G start in Thailand?

Thailand's first 5G spectrum auction was held in February 2020 for frequencies in the 700 MHz, 2.6 GHz and 26 GHz bands. Both AIS⁴³ and TrueMove H⁴⁴ deployed their 5G networks after the spectrum auction in early 2020, using their newly purchased 2.6 GHz spectrum. DTAC launched 5G services using their 700 MHz spectrum holdings in February 2021.⁴⁵

What should Thailand do for 5G and 5G-A development?

It is therefore important for Thailand to maintain momentum and prioritise the following actions for 5G and 5G-A development: — Make at least 300 MHz of spectrum available in the globally harmonised 3.5 GHz band as soon as practicable. Avoid unnecessarily large guard band between mobile and fixed satellite service (FSS).

What is the 5G infrastructure market in Thailand?

The 5G Infrastructure market in Thailand is a pivotal component in the country digital transformation. With the rollout of 5G networks, Thailand is poised to experience a significant boost in connectivity, enabling IoT, smart cities, and improved mobile services.

Is 5G a roadmap for success in Thailand?

ACCELERATING 5G AND 5G-ADVANCED IN THAILAND: A ROADMAP FOR SUCCESS The key challenge is the current use of the extended C-band (3.4–3.7 GHz) and standard C-band (3.7–4.2 GHz) frequencies for satellite services in Thailand, as there are an estimated 10 million or more TVRO services in operation, according to the NBTC.

What is a 4G/5G agreement?

These agreements aim to enhance and expand the 4G/5G capabilities of both NT and AIS. In this agreement, AWN, on behalf of AIS, will establish a 4G/5G

network on the 700 MHz spectrum with a total of 13,500 base stations within 2 years.

Is Thailand ready for 5G?

According to Ookla, while Thailand was one of the first markets to launch 5G in the Asia-Pacific region, 5G services using both 700 MHz and 2.6 GHz bands. The “. full allocation of C-band is still pending, which may challenge the country’s ability to fully leverage the capabilities of 5G technology.”⁶
