

Thailand photovoltaic module exports

Overview

According to Volza's Thailand Export data, Thailand exported 19 shipments of Pv Module from Sep 2023 to Aug 2024 (TTM). These exports were made by 6 Thailand Exporters to 8 Buyers, marking a growth rate of -42% compared to the preceding twelve months. What is Thailand doing about PV module recycling?

Currently, Thailand is also conducting studies on PV module recycling as well as the establishment of pilot PV module recycle plant in order to promote more sustainable use of PV modules, as well as to explore their second life potential.

Who collected data for PV installed capacity of Thailand?

Data collection for the PV installed capacity of Thailand in this report used the secondary data from the Office of Energy Regulatory Commission (OERC) which were collected from the Electricity Generating Authority of Thailand (EGAT), Provincial Electricity Authority (PEA) and Metropolitan Electricity Authority (MEA).

What is a decentralized PV system in Thailand?

In Thailand, these are mostly ground-mounted PV systems with the power purchasing agreement (PPA) in utility applications. Decentralized: any PV installation which is embedded into a customer's premises. In Thailand, these are comprised of rooftop PV systems, ground-mounted PV systems and floating PV systems.

Does Thailand have a demand management system for electric vehicles?

As Thailand is approaching the concrete expansion of electric vehicles (EVs), the development of electricity demand management system of the country was under development in 2020, where utility players were also key parts of this measures.

What is the IEA photovoltaic power systems programme?

The IEA Photovoltaic Power Systems Programme (IEA PVPS) is one of the TCP's within the IEA and was established in 1993. The mission of the programme is to “enhance the international collaborative efforts which facilitate the role of photovoltaic solar energy as a cornerstone in the transition to sustainable energy systems.”
