Overview

How much does electricity cost in Thailand?

The electricity price for businesses is THB 4.300 kWh or USD 0.133. These retail prices were collected in December 2024 and include the cost of power, distribution and transmission, and all taxes and fees. Compare Thailand with 150 other countries. Historical quarterly data, along with the latest update from June 2025 are available for download.

Will Thailand's electricity prices rise or fall after April 2025?

Whether Thailand's electricity prices rise or fall after April 2025 needs to be closely watched, following the state decision to trim the power tariff to 4.15 baht per kilowatt-hour (unit), down from 4.18 baht per unit in 2024. The new power tariff, which is used to calculate power bills, is applicable from January to April 2025.

What factors determine electricity prices in Thailand?

According to the ERC, key factors that determine electricity prices include gas prices as well as a need to allocate part of power bills to reimburse the Electricity Generating Authority of Thailand (Egat) and PTT Plc, the national oil and gas conglomerate.

What is Thailand's energy sector?

Thailand's energy sector is diverse, with the Electricity Generating Authority of Thailand (EGAT) at its helm. The country relies on various energy sources including natural gas, hydroelectric power, and renewable energy.

How is electricity produced in Thailand?

Based on the United States Energy Information Administration data from 2022, electricity in Thailand is produced from the following sources: fossil fuels 90.93%, wind 1.86%, solar 3.06%, hydro 4.15%, nuclear 0.00%, and geothermal 0.00%. You can also compare the energy mix of Thailand to other

countries.

What are the major electricity providers in Thailand?

Major electricity providers in Thailand include EGAT, PEA, MEA, and some private entities, each catering to different regions and needs. Adopting energy-efficient practices and appliances can significantly reduce electricity consumption.
