

Thailand power storage vehicle custom manufacturer

Overview

Who is the first EV battery manufacturer in Thailand?

BOI Secretary-General Narit Therdsteerasukdi stated that Sunwoda Automotive Energy Technology (Thailand) Co Ltd will be the first company in Thailand to manufacture EV battery cells. Previously, the BOI had approved 27.257 billion baht in investments from 41 companies, which focused on assembling imported battery cells into modules or OEM packages.

Is Thailand a good place to export electric truck products?

The electric truck sector is still developing in Thailand and Thailand's battery manufacturers lack advanced technology for upstream production at a cellular level. This presents a great opportunity for exporters of advanced upstream electric vehicle products and energy storage systems.

How can Thailand meet EV truck demand?

Thailand seeks advanced upstream electric vehicle products and energy storage systems to meet surging EV truck demand.

What is Thai EV?

Thai EV is a company committed to offering optimized, convenient, and sustainable EVs for all applications and carrying out the future of top e-mobility in Thailand. They have spent more than a decade in the EVs field on a large scale, which has transformed their competence to all types of EVs today.

Why are electric buses and trucks becoming more popular in Thailand?

The Thai government's initiatives to promote greener transportation and reduce CO2 emissions are driving demand for electric buses and trucks in Thailand. The Electric Vehicles Association of Thailand reports that registrations of new battery electric vehicles (BEV) grew 380 percent from 20,816 units in 2022 to 100,219 units in 2023.

How many Bev electric buses are there in Thailand?

BEV electric buses doubled, from 1,212 units in 2022 to 2,419 units in 2023, and BEV electric truck registrations grew more than tenfold, from 26 units in 2022 to 303 units in 2023. One notable example of the Thai government's efforts is the Port Authority of Thailand's (PAT) aim to achieve the goal of carbon neutrality by 2050.
