

# **The latest distribution of new energy base stations in West Asia**

## Overview

---

What is the energy transition in the Asia-Pacific region?

The energy transition of the countries in the Asia-Pacific region is a story of extremes. While Asia remains home to 82% of the global coal power and has the biggest gas expansion plans, it is also the only region on track with the goal of tripling renewable energy capacity by 2030.

Why is Asia at a crossroads in its energy journey?

Asia stands at pivotal crossroads in its energy journey, grappling with the dual pressures of economic development and decarbonization. In a region that is heavily reliant on coal for power generation, how do we strike a balance between addressing immediate energy demands and securing long-term sustainability?

.

How many people in Asia and the Pacific have no electricity?

About 150 million people in Asia and the Pacific still have no access to electricity. Most economies in Asia and the Pacific are driven by fossil fuels, what's ADB's policy on financing and supporting carbon-based energy projects?

.

How can Asia and the Pacific meet the power supply gap?

“With Asia and the Pacific forecast to generate two-thirds of global energy growth by 2040, meeting this daunting power supply gap will require multidimensional efforts including strong policies, innovative technologies, and long-term financing.”.

What is the ASEAN Power Grid?

The ASEAN Power Grid is a major initiative designed to connect the electricity networks of the 10 member countries of ASEAN, enabling cross-border power trading. ASEAN's vision is to achieve fully integrated grid operations by 2045. ADB is working to improve access to reliable, affordable, low-carbon energy across Asia and the Pacific.

How much coal will India add in 2023?

India added 4 GW of new coal power, consistent with 2023, and plans to expand coal capacity by 90 GW by 2032 to meet rising electricity demand. Despite pledging to halt new coal projects after 2023, Indonesia proposed additional coal plants and expanded its captive coal fleet to support its growing metals industry.
