

Tiled installation of solar integrated machine

Overview

How do I install solar panels?

Batten the roof for the tile being used. 998mm between Bottom Edge (2-1) position & the top of the module is the ideal spacing for the solar panels. If possible adjust tile batten gauge to suit this, if not additional battens will be required to fix the panels to. Install lead replacement flashing -Seal Strip 03 (3-9).

How far above a roof should a solar panel be installed?

This should be no more than 200mm above the tile below. Batten the roof for the tile being used. 998mm between Bottom Edge (2-1) position & the top of the module is the ideal spacing for the solar panels. If possible adjust tile batten gauge to suit this, if not additional battens will be required to fix the panels to.

Who can install and maintain in-roof solar modules?

Installation and maintenance of in-roof solar modules may only be carried out by trained personnel. If you require further information, contact your supplier or or local Wienerberger representative. Please ensure both the installer and owner of the PV system have access to this installation guide for future reference.

How do I install in-roof solar panels?

Always begin in-roof Solar installation from the bottom left. Complete the row from left to right before beginning installation of the row above. Prior to install test each panel with a multimeter to check there are no faults. Installing bottom row of modules: The Lower Frame of the module slots into the Bottom Edge as illustrated.

How do you install aluminium roof tiles?

Nail + clip Nail + adhesive fully adhered to next twice fixed tile Nail and verge

clip Drill second nail hole. The tile should not overhang the panel and should overlap the aluminium top flashing by the minimum headlap of the tile in use. Tile the rest of the roof in the usual way. 9. MODULE WIRING.

Can a two piece roof hook support a solar system?

The two piece design of this upright creates a very solid support for any solar system, but offers just enough flexibility to withstand up to 150 mph wind speeds. With its 100% non-invasive design, installation times are 4x faster than traditional tile roof hooks.

Tiled installation of solar integrated machine

IR-T1 TileBallast(TM) No Penetration Tile Roof Mounting System

The IR-T1 is one-of-a-kind, can be installed in 2 minutes or less and allows for non-invasive mounting of solar modules on tile roofs with no need remove tiles.
