

Timor-Leste Energy Storage Power Supply Specifications

Overview

How many power plants are there in Timor-Leste?

11. Two power plants—the 119.5 MW Hera Diesel Power Plant and the 136.6 MW Betano Diesel Power Plant—supply all of mainland Timor-Leste’s electricity needs. Both plants can run on heavy fuel oil or natural gas but need some modifications.

How is power supplied in Timor-Leste?

The district capitals and rural areas are supplied through a cumulative operational capacity of 12.1 MW. There is no transmission grid in Timor-Leste and the highest distribution voltage level is 20 kV. All power generation is based on diesel generation, using automotive diesel oil as fuel.

What is the Timor-Leste solar power project?

The Project involves the construction and 25-year operation of a new power plant in Manatuto, Timor-Leste, comprising a 72 MW solar power plant co-located with a 36 MW/36 MWh battery energy storage system. This will be the country’s first full-scale renewable energy IPP project.

How much does electricity cost in Timor-Leste?

The flat rates vary from \$3 per month for low-income consumers with a two-amp connection and 6-hour daily provision of power, to \$25 per month for connection above four amps and 24-hour access to power. II. POWER DEMAND AND SOURCES OF ENERGY In 1998, the total peak load of Timor-Leste was reported at 17.1 MW. Power sales stood at.

Why should Timor-Leste invest in solar & storage infrastructure?

José added: “The investment in Timor-Leste’s solar and storage infrastructure is transformative. It will help reduce dependence on fossil fuels while improving grid stability and energy access across the country”. José de Ponte was supported by special counsel Marnie Calli, senior associate Lisa Huynh

and solicitor Jeraldine Mow.

How will EDTL improve the power supply infrastructure in Timor-Leste?

The project will support EDTL improve the power supply infrastructure in Timor-Leste. The principal weaknesses in the power sector are the high cost of generation, inefficient distribution, low level of revenue generation, ongoing need for substantial fiscal subsidies, and excessive technical and non-technical network losses.
