

# **UAE Energy Storage**

## Overview

---

Which Emirates have a battery energy storage system?

Abu Dhabi, the capital emirates of the United Arab Emirates (UAE). Image: Wadiia / WikiCommons. The UAE should deploy 300MW/300MWh of battery energy storage system (BESS) capacity in the next three years, according to one of its main utilities EWEC.

Why should UAE invest in solar power & battery energy storage?

The world-leading project reflects the vision and commitment of the UAE leadership in driving socioeconomic and environmental progress. The accelerated integration of solar power and advanced battery energy storage sets a new benchmark in clean energy, driving sustainability and reducing carbon emissions.

Why is energy storage important in Dubai?

“We follow the vision and directives of His Highness Sheikh Mohammed bin Rashid Al Maktoum, Vice President and Prime Minister of the UAE and Ruler of Dubai, to ensure energy security and sustainability. Energy storage is a vital aspect in ensuring energy sustainability and increasing the reliance on clean and renewable energy sources.

Does the UAE have energy storage systems in the GCC region?

The UAE has installed most of the energy storage systems in the GCC region. In 2016, Abu Dhabi Water & Electricity Authority announced the deployment of around 108 MW of sodium-sulfur-based BESS with an individual capacity of around 4 MW and 8 MW at different locations to support their distribution network.

Why should we invest in the UAE energy sector?

Guided by the UAE leadership, this united effort within the energy sector powers the nation's technological advancement, ushering in a new era of

intelligence, resilience, flexibility, and commercial opportunity while ensuring sustainable and uninterrupted energy for exponential growth.

Should Australia adopt battery energy storage systems?

Australia is adopting battery energy storage systems as a solution to these challenges where it has deployed around 700 MW BESS capacity and has plans to install over 5 GW capacity by 2030. The addition of the energy storage systems would help:
