

Uzbekistan new energy battery cabinet 6 9MWh

Overview

Is Uzbekistan ready for a grid-scale battery energy storage project?

Uzbekistan is in line for its first grid-scale battery energy storage project as it seeks to stabilize and strengthen its existing electricity grids and ramp up the uptake of renewable energy.

Why is battery storage important in Uzbekistan?

Battery storage is being introduced to stabilize the grid and integrate renewable energy. The planned battery systems in Samarkand will store excess solar power and release it when demand is high. Uzbekistan continues to attract foreign investment in renewable energy.

Can Uzbekistan generate 25% of its electricity from renewables?

The country has set a target to generate 25% of its electricity from renewables by 2030. Several projects are underway, including the 1,500 MW Nur Navoi Solar Power Project and the 500 MW Jizzakh Wind Power Plant. Other renewable energy projects in Uzbekistan include the 220 MW Sherabad Solar Plant and the 457 MW Bash Solar Plant.

Who will sell electricity to in Uzbekistan?

The project company is committed to selling electricity to the state-owned National Electric Grid of Uzbekistan JSC under a 25-year Power Purchase Agreement for the project, including a 10-year operating term for the BESS component, signed by these two entities.

What is a power purchase agreement between Uzbekistan & national electric grid?

As part of the agreement, it will sell electricity to the state-owned National Electric Grid of Uzbekistan JSC under a 25-year Power Purchase Agreement for the project, including a 10-year operating term for the BESS component, signed by these two entities.

How will Uzbekistan improve its energy security?

“This project will enhance Uzbekistan’s energy security through the use of innovative solutions and technologies,” noted Marco Mantovanelli, World Bank Country Manager for Uzbekistan.
