

What are the hydrogen energy stations in Slovakia

Application scenarios of energy storage battery products

Overview

As of February 2022, Slovakia has one permanent hydrogen filling station with a filling pressure of 200 bar. Located in Bratislava, it was built by private sector companies Messer Tatragas and Slovnaft. The State owns and operates a mobile hydrogen filling station with a filling pressure of 350 bar.

What are the hydrogen energy stations in Slovakia

[Network of hydrogen stations should be established in ...](#)

Network of hydrogen stations should be established in Slovakia. To produce cleaner H₂, BCF Energy plans to build several factories, the daily production ...
