

What energy and gas filling stations are there in Syria

Overview

Which power stations are in Syria?

This article lists all power stations in Syria. ^ "Aleppo Thermal Power Plant Syria - GEO". Global Energy Observatory. ^ "Al Nasryeh (Nasserieh) OCGT Power Plant Syria - GEO". Global Energy Observatory. ^ "Al-Zara Thermal Power Plant Syria - GEO". Global Energy Observatory. ^ "Latakia Power Plant Syria - GEO". Prime Ministry of Syria.

How many kilowatthours of electricity does Syria generate?

In 2010, Syria generated almost 44 billion kilowatthours of electricity, 94% of which came from conventional thermal power plants. The remaining 6% came from hydroelectric power plants. Refined petroleum products and natural gas fuel Syria's thermal generating facilities.

How has natural gas affected Syria's electricity generation capacity?

Electricity Generation: The disruption of natural gas supplies has had a devastating impact on Syria's electricity generation capacity. Power outages are frequent, and many parts of the country suffer from prolonged blackouts.

How much natural gas does Syria have?

Natural gas In 2015, the EIA estimated Syria's natural gas reserves at 240 billion cubic meters (BCM). Syria possesses both wet and dry gas. Syria's natural gas is used for power production and is needed for reinjection into Syria's oil fields.

What is the outlook for Syria's Energy Resources & Infrastructure?

A quick outlook regarding Syria's energy resources and infrastructure, including the role of declining oil revenue under the Assad regime's governance and the prospects for, and geopolitical impact of, Syrian energy production and trade in a new era.

How many refineries are in Syria?

Syria has two state-owned refineries, one in Homs and the other in Baniyas. The combined nameplate capacity of the two refineries at the beginning of 2015 was slightly less than 240,000 b/d according to the Oil & Gas Journal; 7 a total capacity that met only three-fourths of Syria's pre-conflict demand for refined products.
