

What to do if the communication green base station crashes

Overview

How do I fix a broken base station?

Try to put the base station in B mode if it's in C mode, or try to use the sync cable, don't forget to put your base stations in A and B mode. If that doesn't fix it, I would have no clue of what can be the issue. The base station would seem to be broken.

How do I know if my base station is working?

Step 1: Check the Status Light. Open the electronics box & check to see if the status light (outlined in red below) is flashing green. If it is flashing green, your base station is working. Step 2: Check your Cheat Sheet (if you have one). 'Good' Your base station is working correctly.

How to fix lighthouse base station?

The procedure consists in upgrading the system manually twice, once with the fix-up firmware (lighthouse_tx_htc_2_0-calibration-rescue-244.bin) which will try to fix the base station, then again with the current latest firmware (lighthouse_tx_htc_2.0-436-2016-09-20.bin). Unplug the power adapter from the power outlet. 2.

How do I fix controller tracking problems before a base station firmware update failure?

Originally posted by BoFHay: Not sure about the controller tracking problems prior to the base station firmware update failure, but you should be able to recover that base station by manually updating its firmware: Locate the firmware files: right-click on SteamVR in Steam and select Properties.

How do I delete a CRP-disabled base station?

Plug in the power lead to the base station while holding down the mode button on the back. The base station should enumerate as a mass-storage device called CRP_DISABLED (you can release the button once you see this). Inside

the drive should be a file called "firmware.bin", delete it.

How do I recover a failed base station firmware update?

Thank you. Not sure about the controller tracking problems prior to the base station firmware update failure, but you should be able to recover that base station by manually updating its firmware: Locate the firmware files: right-click on SteamVR in Steam and select Properties.
