

Where are the hydrogen energy stations in Costa Rica

Overview

Is green hydrogen a key element in Costa Rica's decarbonisation efforts?

The NGHS positions green hydrogen as a pivotal element in Costa Rica's decarbonisation efforts, mainly targeting challenging sectors to electrify, such as heavy-duty transportation and industry. The strategy emphasises utilising the nation's renewable energy matrix, which is nearly 100% renewable, to produce green hydrogen competitively.

What is Costa Rica's 2023 Green Hydrogen strategy?

Costa Rica's 2023 Green Hydrogen Strategy aims for a potential production capacity of up to six million tonnes per year and an installed electrolysis capacity of 150 and 500 megawatts by 2030, marking their target for green hydrogen production capacity within the country.

Can green hydrogen accelerate Costa Rica's path to net-zero?

The high potential for renewable energy in the country – Costa Rica has produced more than 98% of its electricity in the last six years through renewables – implies there is a clear opportunity for green hydrogen production to accelerate Costa Rica's trajectory towards net-zero in hard-to-abate sectors.

How to find a gas station in Costa Rica?

Gas stations look like just like any other gas station in the world. In Spanish, gas station is “Gasolinera.” Many of the gas stations will have a huge sign that says something like “Gasolinera X name of area” or “Servicentro X name of area.” The best way to find a gas station in Costa Rica is by using WAZE or Google Maps.

How safe is a green hydrogen ecosystem in Costa Rica?

at its green hydrogen ecosystem in Costa Rica's northwest province of Guanacaste. The small demonstration project has operated reliably and with a

100% safety record. It has enabled more than 66,000 km of emissions-free transport.

Why did Costa Rica create an alliance for hydrogen?

Additionally, in order to coordinate Costa Rica's hydrogen ecosystem and promote its use across the country, the group involved in the first initiative, along with a few additional companies and organizations, formed an Alliance for Hydrogen for management of business, planning, and operations.

Where are the hydrogen energy stations in Costa Rica
