

Where is the power supply for the battery cabinet

Overview

How does a ups switch to battery mode?

When there is a power outage or some disturbance in the utility, the UPS modules automatically switch to Battery mode. In Battery mode, the battery supplies power to the critical load as in normal UPS system operation. The only difference is that the critical bus in the parallel cabinet is the AC output.

How do I Wire A Powerware 9315 ups module?

Refer to the Powerware 9315 Installation manual provided with the UPS system for input feeds to the UPS module. Each UPS module must be wired to its corresponding module output breaker in the cabinet with power cables sufficient for carrying the load. Recommended wiring size is listed in Tables A---3 and A---4 of Appendix A of this manual.

How do I install a powerwarer 9315 cabinet?

Prepare the site for the cabinet installation. Inspect, unpack, and unload the cabinet. Create an installation plan for wiring the parallel cabinet to the corresponding UPS modules. Prepare for wiring. Complete the installation checklist from the PowerwareR 9315 Installation manual.

How much conduit do I need for A Powerware 9315?

The top entry connection requires installation of 1/2-in. flexible conduit within the UPS. Bottom entry connection requires no additional routing of conduit within the UPS. For UPS external wiring requirements, including minimum AWG size of external wiring, see the Powerware 9315 Installation manual provided with the UPS system.

What is a Powerware 9315 uninterruptible power supply (UPS)?

This Page Intentionally Left Blank. The Powerware 9315 Uninterruptible Power Supply (UPS) continually monitors incoming electrical power and removes the surges, spikes, sags, and other irregularities that are inherent in commercial

utility power.

How do I install a parallel ups cabinet?

Use a forklift or pallet jack to move the packaged cabinet to the installation site, or as close as possible to the site, before unloading from the pallet. Prepare the site for the cabinet installation. Inspect, unpack, and unload the cabinet. Create an installation plan for wiring the parallel cabinet to the corresponding UPS modules.
