## Overview

---

Are modular batteries worth it?

If you're planning to upgrade your home's energy system or are new to solar power, consider the flexibility and scalability of modular batteries. If nothing else, they can unlock greater value from your solar by allowing you to bypass the 133% rule. Start small, think big, and take control of your energy future in bite-sized chunks.

What is a modular battery system?

In contrast, modular battery systems present a practical alternative, offering flexibility and scalability that large, monolithic batteries can't match. Batteries come in various shapes and sizes, each with unique advantages. For this article, we can classify them into two categories: large single-unit systems and smaller modular units.

What is the difference between Powerwall and modular battery systems?

The only problem with Powerwall is if you need more storage, you have to add a second 13.5 kWh Powerwall or nothing. In contrast, modular battery systems present a practical alternative, offering flexibility and scalability that large, monolithic batteries can't match. Batteries come in various shapes and sizes, each with unique advantages.

How many batteries do you need for a modular system?

While modular systems are versatile, they often require a minimum number of units to function effectively. For instance, the Sungrow SBR can actually be purchased with a "dummy" battery as a spacer to make the hardware designed for three batteries bolt together with only two.

Should UPS batteries be installed on racks or in cabinets?

Early on in a UPS design a decision must be made on whether batteries should be installed on racks or in cabinets. Both have pros and cons. The following

are typical design considerations.

Why do you need a battery cabinet?

Ease of use is one of the principle selling points for battery cabinets. It is convenient to service the equipment when the UPS and the battery (ies) are right next to each other. Conversely, it is inconvenient to have to go to a separate room when open-rack batteries are installed.
