

Wind Solar and Storage Third Quarter Report

Overview

How many mw did solar install in the third quarter?

The industry connected 2,142 MW / 6,227 MWh of storage in the third quarter, bringing year-to-date installations to 4,374 MW / 13,444 MWh. Solar installed 3,121 MW in the quarter, outpacing the rate of installations in 2022 but slightly behind 2021 volumes.

What percentage of solar PPA announcements were based on wind?

Power Purchase Agreements: Through Q3 of 2023, solar comprised 59% of all PPA announcements while land-based wind represented 32%. Compared to Q3 of 2022, solar PPA announcements for this quarter decreased by 59%, wind by 21%, and battery storage by 55%.

What was the largest utility-scale solar project in the quarter?

TotalEnergies' Danish Fields Solar was the largest utility-scale solar project brought online during the quarter. Located in Matagorda County, Texas, the project has a capacity of 600 MW and is paired with a 150 MW/225 MWh battery storage system that also became operational during the quarter.

How much solar was commissioned in the first quarter of 2024?

Cumulatively, 19.5 GW of solar was commissioned in the first three quarters of 2024, more than double the amount compared to the same point in 2023. About 39% of the development in-quarter took place in Texas. TotalEnergies' Danish Fields Solar was the largest utility-scale solar project brought online during the quarter.
